The returns shown above may be lower if income is not reinvested. Gross returns do not reflect the deduction of investment advisory fees or any other expenses that may be incurred in the management of the account. Net performance was calculated using actual management fees, which includes performance fees. For accounts that were charged a performance-based fee, net performance for these accounts was calculated using the highest applicable management fee, based on the composite's tiered management fee schedule for the period, applied monthly, unless the performance fee was higher. The performance-based fees typically consist of a base fee component and a total maximum fee of 1.30%. Information regarding period specific fee schedules is available upon request. The three-year annualized standard deviation measures the variability of the composite gross-of-fees returns and the benchmark returns over the preceding 36-month period. The annual composite dispersion presented is an asset-weighted standard deviation calculated for the accounts in the composite the entire year using gross returns. Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request. Beginning January 1, 2010, accounts with significant cash flows (defined as exceeding 50% of an account's total assets) are taken out of the composite for the month during which the cash flow occurred.
