Index: Russell 1000® Growth

The Sustainable Growth Equity Composite contains fully discretionary accounts that focus on long-term growth of capital by investing in a portfolio of approximately 35 to 50 equity securities typically with a market capitalization of \$6 billion or more at the time of initial purchase, which exhibit potential growth and favorable performance in Environmental, Social and Governance (“ESG”) characteristics. For comparison purposes, the composite is evaluated against the Russell 1000® Growth Index, which is designed to measure the Large Cap growth equity segment. Index returns are not covered by the report of independent verifiers and are provided for informational purposes only. The index returns assume the reinvestment of dividends but do not reflect the impact of fees, applicable taxes or trading costs which may also reduce the returns shown. Securities contained in the index maybe different than the securities contained in the composite and could have different risk and reward profiles.

The three-year annualized standard deviation measures the variability of the composite’s gross returns, and the benchmark returns over the preceding 36-month period.
