Net performance was calculated using actual management fees except for accounts that were charged a performance based fee; net performance for these accounts was calculated using the highest management fee of 0.75%, applied monthly. The three-year annualized standard deviation measures the variability of the composite and the benchmark returns over the preceding 36-month period. The three-year annualized standard deviation is not presented for 2002 through 2010 because the disclosure is not required for periods prior to 2011. The annual composite dispersion presented is an asset-weighted standard deviation calculated for the accounts in the composite the entire year. Policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request. Beginning January 1, 2010, accounts with significant cash flows (defined as exceeding 50% of an account's total assets) are taken out of the composite for the month during which the cash flow occurred.
