The **Dividend Growth Equity Composite** contains fully discretionary accounts that focus on long-term growth in equity securities of predominately large capitalization companies with a history or prospect of paying increasing dividends. For comparison purposes, the composite is measured against the NASDAQ U.S. Dividend Achievers Select® index. The NASDAQ U.S. Dividend Achievers Select® Index is constructed to reflect the performance of companies that trade on the NYSE or NASDAQ and have increased their annual regular dividend payments for the last ten or more consecutive years. The S&P 500® Total Return Index is used as a broad market proxy. Index returns are not covered by the report of independent verifiers and are provided for informational purposes only. The index returns assume the reinvestment of dividends but do not reflect the impact of fees, applicable taxes or trading costs which may also reduce the returns shown.

Net performance was calculated using the product's management fee of 0.75% applied monthly. The three-year annualized standard deviation measures the variability of the composite and the benchmark returns over the preceding 36-month period. The three-year annualized standard deviation is not presented for 2011 and 2012 because the composite did not yet have 36 monthly returns.
